

GIVE DEBRIS THE BRUSH OFF

Countless eye injuries occur within our industry during PPE removal.

Follow these simple steps to remove dust and debris.

STEP 1

Close eyes and lean forward. Make sure you are downwind.

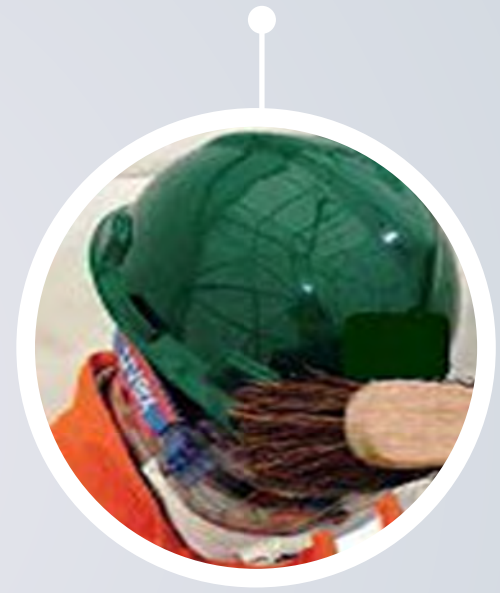

STEP 2

Brush forward around sides of PPE using a soft brush.

STEP 3

Brush lightly across front, eye and breathing protection.

STEP 4

Brush down shoulders.

STEP 5

Work down body. Ensure eyes are closed when removing PPE.

STEP 6

Inspect PPE for contamination before reapplying.
