

10 CONFINED SPACE ENTRY

A confined space, such as a vessel, tank, pipe, cellar or excavation, can contain explosive gas, toxic or asphyxiating atmosphere or other dangers such as energy releases, lack of oxygen, exposure to hazardous chemicals, things that can fall on you or crush you, or that you can fall from. Authorized access keeps you safe. Onsite supervisors will evaluate all potential confined spaces to determine if confined space conditions exist and will consult with local HSE personnel to verify that hazard controls are in place as required.

- I confirm energy sources are isolated.
- I confirm the atmosphere has been tested and is monitored.
- I check and use my breathing apparatus when required.
- I confirm there is an attendant standing by.
- I confirm a rescue plan is in place.
- I obtain authorization to enter.
