

Oxy GoM Contractor,

Oxy USA Inc's Gulf of Mexico business unit (Oxy GoM) has updated our *LiveSAFE Tracking* requirements through ISNetworld. As of October 1, 2024, OXY will no longer require the **Introduction to LiveSAFE** orientation (video) to be tracked through the ISN Online Training tool. All personnel will be required to watch this video at the heliport before going offshore.

OXY will require that all personnel who travel offshore must complete the OXY Full Day in-person **LiveSAFE Orientation Course**. *This training will be tracked through the ISN Training Qualification (TQ) and by OXY.* To register your personnel for this course please access "OXY's Contractor Access Portal" www.ocap.gom/gom/livesafe.com . LiveSAFE Training registration links are located on the left side of the portal page.

When registering your personnel for this course it is mandatory to provide the employee's name and unique ISN ID # to OXY. **Personnel will not be allowed to complete the course without this information.** OXY will use this information to accurately assign course completion credit for the employee when scanning for offshore travel. Personnel who have not attended LiveSAFE will scan "yellow" at the heliport in the near future and will have restrictions placed on them prior to being released to work on OXY facilities.

*Please note that the LiveSAFE orientations are not currently included within Oxy GoM's QuickChek requirements for offshore travel. **This will change in the near future and will be communicated once active.***

The following items are attached for your reference and details on the LiveSAFE In-Person requirement below:

TQ Step by Step Guide

Training Qualifications: LiveSAFE Orientation Course (In Person) – every 5 years

Once your applicable employees have completed the in person LiveSAFE Orientation Course and received a certificate from Oxy, please login to ISNetworld to assign the applicable employees to the LiveSAFE TQ project and document the date this course was completed.

Please ensure your company employees have a digital copy of their Oxy LiveSAFE certificate available upon request.

Your employees can also access their jobsite requirements, upload their certificate to the digital wallet and complete online trainings on-the-go through the **Empower app**. For more information on how Empower benefits you and your workers, please reference the attached one-pager and visit the Empower website [here](#).

If you need additional assistance, please reference the Help Center in your ISNetworld account or contact the ISN Customer Service Team at (800) 976-1303 or click [here](#) and select "Let's Chat."

Thank you for complying with Oxy GoM's Online Training requirement.

Sincerely,

HSE Director, US Offshore
