

# 10 WORK AUTHORIZATION

Work authorization is more than just a person in charge signing a Permit to Work, Job Safety Analysis or Safe Work Permit form (as applicable to the Business Unit): it is seeking and having authorization to start, resume, or hand-over a task.

The person in charge of the work confirms that it is safe to start, that controls are in place and effective, those involved understand the task, and the task can be performed as planned.

I confirm if a permit is required.

---

I am authorized to perform the work.

---

I understand the permit conditions.

---

I confirm that hazards are controlled and it is safe to start.

---

I stop and reassess if conditions change.
